

SAVE TIME, RUNNING COSTS AND CARBON FOOTPRINT

The proven charge point management
system for Smart Fleets

WHY DELAY, WHEN YOU CAN
**MAKE SIGNIFICANT
SAVINGS...**

OUR CUSTOMERS...

**REDUCE THEIR
RUNNING COSTS** by
up to **£1 MILLION** and
SAVE 130,000kg
of CO2 a year.

Nottingham City Council

Saves £1 million in running costs
and **1,162 tonnes of CO2** every
year.

Neath Port Talbot Council

Switched to save 16,000kg of
CO2 and grow network from 17 to
35 in three months.

Wincanton

Halved running costs and saved
40,000kg of CO2 over 2500
charges.

CHARGE POINT MANAGEMENT FOR SMART FLEETS

A single place to manage and report on your fleet vehicles, whether they are at home, on the road or in the workplace.

Book a demo 

Minimise disruption and recoup costs

Our platform gives you the flexibility to minimise disruption and recoup costs as your charging needs evolve, regardless of OCPP charger brand or vehicle requirements.

Real time data and analytics

Manage your fleet through a single source of real time data, historical reports and analytics to reduce running cost and carbon footprint and increase productivity.

Manage grid capacity

Monitor the electricity needed to balance site and grid capacity with in-built load management systems, and safety buffers to avoid grid upgrades.

Deliver reliability

Drive charge point reliability with fault alerts, 'click to fix' remote maintenance, and diagnostics to inform 'once and be done' site maintenance for fleet and public networks.

Simple vehicle and staff management

Easily remove or assign staff and vehicles with access to thousands of charging stations across the UK and Europe, whilst benefiting from one set of driver receipts.

Eliminate range anxiety

Eliminate range anxiety for your fleet by charging your vehicle on the go with the Clenergy EV fuel card or app, with access to 250,000+ charge points across UK & Europe.

Simplify admin

Reduce admin with payment flexibility* and single billing reports, with full charger analytics available at-a-glance through our admin Dashboard.

24/7 driver support

Your dedicated Account Manager coordinates your charge point onboarding and our 24/7 driver support team handle issues at point of use to keep your fleet running every day.

*Payment by RFID, fuel cards, fobs, contactless card payment, online, Google, Apple apps

MONETISING YOUR NETWORK: GOVERNMENT GUIDELINES

Our software integrates a good driver's experience with charge point management for Smart Fleets. We also give you the flexibility to monetise your investment through industry leading features designed to meet Government and State regulations for public networks.

- View available chargers without paying or being tied to T&Cs 
- Roam across charging networks with single app or RFID card 
- Pricing tariff clearly shown at the start of a charge (set for entire charge) 
- Contactless bank card payment including Google and Apple Pay 
- 24/7 Helpline advertised on all chargers for drivers in difficulty 
- Fault alerts and 'click to fix' maintenance supports 99% reliability 

*Drivers can sign up, start a charge, and pay in a fully realized Welsh language App

We're ISO accredited and on the following frameworks:

Crown Commercial Service

Efficiency East Midlands Ltd

ESPO supplier framework

NIC EIC approved contractor

EV DPS supplier framework

ISO 27001 accredited UKAS organisation

Cyber Essentials

YOU HAVE THE...

POWER, FLEXIBILITY & CONTROL

We're a leading charge point management system, with software on thousands of charge points used by over 100,000 drivers. Our customers range from charge point operators, employers, fleet leasing companies, and critical national infrastructure including the police, fire brigade, transport, goods, pharmaceuticals, and the NHS.
