

EV ROAMING FOR CPOs

EV Roaming agreements let drivers charge across networks with a single app or card, improving their experience and giving CPOs visibility across platforms.

Why do CPOs need it?

EV Roaming lets CPOs advertise on other networks, signposting drivers to their chargers to win more business at existing sites.

Benefits

Advertise to millions
Increase profitability
Increase visibility

Used by

CPOs
Drivers

Secure charger visibility from millions

From our extensive range of partner networks, with more being added the whole year round.

EV Roaming in Action

- Advertise your chargers to millions of drivers
- Provide charging across a host of popular networks
- Advertise on a range of popular mapping systems
- Eliminate the need for multiple apps or card juggling
- Allow more drivers to use your existing chargers
